# Calcium Plus+

## Calcium 5%, TransPlus+ and Seaweed

### Description

**Calcium Plus+** is a concentrated liquid calcium (**Ca**) product specifically designed for foliar feeding and correcting calcium deficiencies in the plant. **Calcium Plus+** also contains unique biostimulant packages for overall stress management, enhanced nutrient uptake, and root development. The combination of calcium (**Ca**), **TransPlus+**, and seaweed provides both structurally a stronger turf and a biologically more active root system. This results in better establishment, fewer diseases, and a more consistent playing surface.

### Additional Benefits

- Highly effective against heat stress.
- Strengthens cell walls – more resistant to wear, mechanical stress, and diseases.
- Counteracts soil compaction and sodium stress.
- Stabilizes pH in the root zone – improves nutrient uptake.
- Enhances root development and recovery.
- Promotes microbial activity – healthier root environment.

### Contents:

Calcium (Ca) 5%  
TransPlus+ biostimulant and Seaweed

Pack sizes:	10 L
	100 L

### Application

- Apply using spraying equipment that produces a fine mist.
- Total spray volume (water + product): between 300–350 liters per hectare.
- Do NOT water in after application. Preferably wait 3 hours before rainfall and/or irrigation.
- Apply every 7–21 days, depending on stress levels.

**Dosage:** Greens and tees: 10-15 liters/ha.
