CropHealth Fairway+ 20-0-0 + 2 Mg + Seaweed

Description

Fairway+ is a liquid nitrogen (**N**), magnesium (**Mg**), and seaweed product. It is specifically designed for fertilizing fairways, tees, and fore greens. Nitrogen and magnesium are very important for the plant's overall chlorophyll process, which gives it its natural green color. Seaweed contains cytokinin, which increases the turf's resistance to diseases and overall stress. It also stimulates microbial activity, which in turn improves overall water and nutrient uptake. Also, seaweed provides micronutrients such as iron, manganese, zinc, copper, and boron.

Further information

- Rich in nutrients thanks to seaweed.
- Urea and nitrate nitrogen ensure both immediate and long-lasting effect.
- Growth control: steady and stable growth without excessive growth.
- Improves soil structure.

Contents:

Total nitrogen (N)	20%
Urea	17%
Nitrate	3%
Magnesium (Mg)	2%

Pack sizes:	1000 L
-------------	--------

Application

- Apply using spraying equipment that produces a fine mist.
- Total spray volume (product + water): 400–600 liters/ha.
- Water in lightly after application.
- For foliar feeding: use a lower dose rate around 300 liters/ha of water, do not water in.

Dosage: Tees, fore greens and fairways:
20–60 liter/ha every 20–40 days.
