Humik+ TP+

Description

Humik+ is a premium product for soil applications, specially designed for spraying the soil. The product contains a unique combination of highly concentrated humic acid and sea minerals, as well as a broad spectrum of essential micronutrients. These are crucial for amino acid production and contribute to increased plant strength and improved disease resistance.

With its high pH value (12), Humik+ is also well suited to discourage moss without harming the grass. Please ask a CropHealth representative for more info for promoting turf and discourage moss.

Benefits

- Increases nutrient retention capacity in the root zone (CEC value)
- Improves overall gas exchange
- Enhances disease resistance
- Discourages moss growth
- Strengthens grass growth
- Buffers salts and heavy metals

Contents:

Total Humic Extract:	26%
- Humic Acid:	10%
- Fulvic Acid:	16%
Potassium (K ₂ O):	8%

Pack sizes:	100 L
-------------	-------

Application

Apply using a larger nozzle with a total spray volume of 500–600 L/ha. Water in after application.

For moss treatment: 15 liters of Humik+ in 100 liters of water, spot treatment of affected areas. Lightly water in after application and follow up with night irrigation. Can also be applied during rain.

Dosage: 10-20L/ha
