Culterra 10-2-6

5Ca + 1,5Mg + 0,5 Fe TransPlus+

1-2 mm prilled

Description

A balanced blend of mineral and organic fertilization, providing both immediate effect and long-term support for the soil's microbial life. Thanks to the predictable nitrogen release, no "mineral fertilizer peaks" occur. Reduced thatch formation due to the continuous stimulation of beneficial soil bacteria. The organic buffer results in a low salt index, which in turn gives the fertilizer a low risk of burn. Enriched with mycorrhiza and **TransPlus+**, a highly concentrated biostimulant that enhances nutrient uptake and reduces plant stress

Benefits

- Reduces soil disease pressure.
- Binds mineral nutrients with organic matter.
- Balanced growth due to the gradual supply of nutrients.
- Potassium in complex form for controlled release.
- Increased biological activity for stronger and healthier plants.
- A good choice as a base fertilizer for mixed greens.

Contents:

Total nitrogen (N)	10%
- Organic nitrogen	3%
- Ammonium nitrogen	2%
- Urea nitrogen	5%
Potassium (K)	6%
Phosphorus (P)	2%
Calciumoxide (CaO)	5%
Magnesiumoxide (MgO)	1,5%
Iron (Fe)	0,5%
Organic material:	38%
-From meat meal, feather meal, oilseed meal, and chicken manure	

Application

- Apply evenly using a centrifugal spreader.
- Water in the product to promote faster dissolution.
- Ideally used as the base of a nutrient program.
- For new establishment, the application rate may be slightly increased.

Dosage: 2 kg / 100 m²

Pack sizes:	25 kg
