Culterra

12-4-6 + 0,5Mg 0,5Fe

Crushed 1–4 mm

Description

A balanced blend of mineral and organic fertilizer providing both immediate effect and long-term support for soil microbiology. Thanks to the predictable nitrogen release, there are no “mineral fertilizer peaks.” Reduced thatch formation due to permanent stimulation of bacterial soil life.

The organic buffer results in a low salt index, which in turn gives the fertilizer a low risk of burning.

The crushed structure ensures even spreading and rapid dissolution.

Benefits

- Reduces soil disease pressure.
- Binds mineral nutrients with organic matter.
- Balanced growth due to gradual nutrient release.
- Potassium in complex form for controlled release.
- Increased biological activity results in stronger and healthier plants.
- The crushed structure dissolves quickly.

Application

- Spread evenly using a centrifugal spreader.
- Water in the product for faster dissolution.
- Ideally used as the base of a nutrient program.
- At new establishment, the application rate may be slightly increased.

Contents:

Total nitrogen (N)	12%
Organically bound nitrogen	2,5%
Ammonium nitrogen	2%
Urea nitrogen	7,5%
Potassium oxide (K ₂ O)	6%
Phosphoric anhydride (P ₂ O ₅):	4%
Iron (Fe) and Magnesium (Mg)	0,5%
Organic material	35%

- From feather meal, oilseed meal, bone meal, chicken manure, and cocoa bean shells

Pack sizes:	25kg:	36 pcs/pallet
	500 kg	1 pcs/pallet

Dosage: 2–3 kg / 100 m²
